

# How to replace the diode in a laser lamp

## Overview

---

To get the old diode out of the housing it's in you'll need to punch it out from the lens side, press the new diode in carefully, do not break pins off. A detailed post of how to replace a laser diode and setup voltage and current on DC/DC converter. Valid for Endurance 10 watt / 10 watt Delux / 10 watt PLUS / 10 watt PRO's 10 Watt (10000 mw) "DeLux" real rated power output laser head for your 3D printer. Replacing the laser diode in an AIXIZ laser housing simple as following this video Hope you enjoy!!. Diode specification Size:12mmx35mm Can the supply you have produce 360 mA?

What kind of output beam does it produce?

Has anyone here replaced their diodes on their lasers?

Most replacement diodes I see look like they have a cap on them.

## How to replace the diode in a laser lamp

---

### Laser lamp replacement for Laser Projectors

I've searched, but only found articles talking about basic bulb replacement on regular bulb projectors in articles comparing Laser to conventional projectors. What happens when a laser PJ
