Introduction to Core Switch Configuration

The most important purpose of the layer 3 switch is to speed up the data exchange within the large LAN, and the routing function is also for this purpose. It can do one route and multiple forwarding.

Cisco Data Center Infrastructure 2.5 Design Guide

Data Center Multi-Tier Design Overview Data Center CORE Layer Data Center Aggregation Layer Data Center Access Layer The data center core layer provides a fabric for high-speed packet switching between multiple aggregation modules. This layer serves as the gateway to the campus core where other modules connect, including, for example, the extranet, WAN, and Internet edge. All links connecting the data center core are terminated at Layer 3 and typically use 10 Gig See more on cisco cobtel
