

How to unplug network cables and fiber optic cables

Overview

In this section, we'll walk through all the steps to terminate a fiber cable with a connector in less than 5 minutes. You'll need to prepare: a cleaver, a stripper, a cable clamp, a gauge, Kevlar scissors, cleaning supplies and the connector. As an experienced technology writer who has covered broadband advancements for over a decade, I aim to provide readers with trustworthy instructions endorsed by industry experts. Are you interested in seeing how fiber optic connectors get mechanically plugged into an adapter?

This video goes over common types of connectors, their respective adapters, and how to properly connect and disconnect them. And any mistakes that occur in the termination will cause the system to break down or. This protects the internal electronic components and helps ensure the fiber port is inactive, minimizing the risk of exposure to the infrared light signal.
