# **How to use optical fiber optic cable marking OT**

## Overview

---

Learn how to label fiber optic cables professionally with this complete guide. Make sure you use a consistent format, such as "FB-03-A142" where FB indicates fiber, 03 is. Misidentification can cause downtime, disrupt essential services, and create safety hazards in data centers. The text on the cable starts with the Corning product name "Corning Rocket Ribbon (TM) Optical Cable," date of manufacture "01/2022" and a serial number. Per TIA/EIA standards, the following color coding applies for non-military fiber optic installations: Multimode OM1 = Orange or Slate (Watch for this! OM1 is not compatible with connectors for OM2/OM3/OM4) However: Per TIA 598-C, it is permissible to use different jacket colors as long as the cable.
