

How to use the clamps on cable trays

Overview

The fittings can be fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. In this video, we will show you how to use 3 different cover clamps (PKP-SP1, PKP-SP2 & PKP-SPM1) that enable additional mechanical fastening of the cable trays cover. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience for each of these installation challenges and safety. Whether you're a tech-savvy professional or just looking for a way to tidy up your home office, this guide will help you get started. Cable tray support systems consist of several components, including clamps, brackets, supports, and fittings.
