

# **How to wire the three cables in the distribution box**

## Overview

---

Use three conductors for this setup: a hot wire (usually black), a neutral (white), and a ground (bare or green). In this video, we'll walk you through the process of wiring a home distribution box with a detailed connection diagram. Unlike single-phase systems, where power is distributed using two wires (one live and one neutral), 3 phase DB box wiring involves three live wires and a neutral wire. Distribution board is a safe system designed for house or building that included protective devices, isolator switches, circuit breaker and fuses to safely connect the cables and wires to the sub circuits and final sub circuits including their associated Live (Phase) Neutral and Earth conductors.
