

Huawei GPON optical module speed

Overview

984 standard, this module features a Class B+ or Class C+ optical transceiver, capable of achieving downstream data rates of 2. A GPON optical module is connected to one SC optical fiber to provide the Gigabit-capable passive optical network (GPON) access service. The Huawei EG8247W5 is a next-generation GPON ONT that enhances the user experience with its robust features and performance. Designed for both residential and commercial environments, the Huawei EG8247W5 delivers seamless connectivity and high-speed internet. By integrating the functionality of a full-scale Optical Network Unit (ONU) into a standard Small Form-factor Pluggable (SFP) footprint, these modules allow service providers and enterprises to upgrade existing switches and routers to GPON capabilities instantly, significantly reducing hardware.
