

Huawei Network Access Switch Power Board

Overview

It converts the 220 V AC or 110 V AC input power into -48 V DC, +12 V DC and +3.3 V DC, and feeds the power to the service boards, control board, and fan monitoring board through the backplane. All power modules (except the 870 W PoE power module) are hot swappable, but it is highly recommended that you power off a switch before removing or installing a power module in the switch to protect personal and equipment safety. The AC power unit provides overcurrent protection, output overvoltage protection, short circuit protection, and. The Huawei H902PILA Connect Power Board is a reliable and versatile component designed to efficiently manage power distribution for various Huawei network equipment. This ensures seamless operation and enhances the overall performance of your ICT infrastructure. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education.

Huawei Network Access Switch Power Board

Huawei ES0W2PSA0150 150W AC Power Module

If a switch uses 1150 W power modules, it is recommended that the switch be installed in an 800 mm or deeper standard cabinet. If the switch is installed in a 600 mm deep cabinet, the rear door of the
