

Huawei S5731 as a core switch

Overview

Built on Huawei's unified Versatile Routing Platform (VRP), CloudEngine S5731-S switches provide enhanced Layer 3 features, simplified Operations & Maintenance (O&M), Intelligent Stack (iStack) technology — allowing multiple stacking-capable switches to function as a single. The CloudEngine S5731-S series offers a range of standard gigabit access switches, with all-GE electrical/optical ports and fixed 10 GE uplink ports. For example, the integrated wireless AC capabilities can manage up to 1,024 wireless APs; the free mobility feature even in encrypted traffic, and network-wide threat deception. Breaking down into three series— S5731-L (Light), S5731-H (High-end), and S5731-S (Standard) —the series supports.
