S Series Switches Stack Deployment Best Practices

Information on user device interfaces shall prevail. Differences will not be described in the document. For the S series switches, multiple fixed switches can set up a logical device called stack, and two

Configuring Attributes for an Optical Interface

After the unidirectional single-fiber function is configured on interface 10 GE2/17/2, you only need to connect the TX end of the optical module on 10 GE2/17/2 to the RX end of the optical module on the

[Read More](#)

Displaying Optical Module Information

A switch must use optical or copper modules that have been certified for use on Huawei switches. Non-certified optical or copper modules cannot ensure transmission reliability and may affect service

Optical Fiber

AOC An active optical cable (AOC) is a fixed-length optical fiber with optical modules at both ends. It can be directly connected to an optical port on a device. In short-distance connection scenarios, AOCs

Installing Optical Transceivers and Connecting Optical Fibers

Before connecting optical fiber cables, read the following precautions: Do not overbend optical fibers, and the radius should not be shorter than 40 mm. Do not bundle the optical fibers too tight.

Optical Module Solutions for Huawei S5700/S5720 Series Switches

When using switches, we may encounter many confusions, such as what types of optical modules are needed for different models of Huawei switches, and how to resolve issues encountered

[Read More](#)

Introduction of Optical Modules on Huawei Switches

If an optical module is installed in a running switch, you can run the display transceiver command to view parameters of the optical module, including the
