

Huawei invisible fiber optic cable connected to router has no internet

Overview

If the router's indicator is steady red, it is not connected to the Internet. Many times such issues occur due to some simple glitch while establishing the network. Work laptop internet will work IF, the Firewall on the security software installed is disabled. This connected but no internet error means your device has successfully authenticated with your router and received an IP address, but it cannot reach anything beyond your local network. The problem affects Windows PCs, Macs, iPhones, Android phones, and every other WiFi device equally.
