

Huijue GJFJV Optical Cable

Overview

Flame retardant materials used in the optical cable make it safer when installed indoor. Product type: GJFJV Application: FTTH, special line, LAN
Product description: Tight buffered optical fiber, aramid yarn, PVC sheath
Laying mode: Duct/bridge/channel/wall-mounted. Indoor Fiber Optic Cables (GJBFJH/GJBFJV) are specifically designed for building interior fiber optic communication. With LSZH (Low Smoke Zero Halogen) jackets producing low smoke and zero halogen during combustion, they meet indoor fire safety regulations. The tight buffer fiber wrapped with a layer of aramid yarn as strength member, then completed with a layer of PVC or LSZH material as out jacket. 1~2 optical fiber is directly sheathed with a flexible layer of material to form 900µm tight buffered optical fiber. Outdoor/Indoor Fiber Optic Cable, our annual output is 8,000,000 KM; FTTH/FTTX/FTTA Cable, it is 6,000,000 KM per year; Patch Cord/Pigtails, it is 12,400,000 Pieces per year.

Huijue GJFJV Optical Cable

0.6 GJFJV Indoor Fiber Optic Cable , Otscale

Detailed Description Product Name: 0.6 GJFJV Model: 0.6 Indoor Cable Number: I001
Application: Components for various indoor cables Suitable for patch cords
