

# **Incoming fiber optic cable speed**

## Overview

---

Fiber optic internet can offer speeds from 300 Mbps all the way up to 5 Gbps in some areas, far surpassing most cable or DSL options. With maximum fiber optic cable speed reaching 100 Gbps commercially and laboratory achievements exceeding 1. In the complex landscape of fiber optic infrastructure, selecting the right cable type—single-mode (OS1/OS2) or multimode (OM1/OM2/OM3/OM4/OM5)—can define a network's speed, reach, and cost-effectiveness. This guide dissects their technical nuances, evolution, and real-world applications. Here's how it works: Data Encoding: Information is converted into binary code (1s and 0s).
