OUTDOOR BATTERY CABINET

Overview

6-Core FTTH Fiber Distribution Box is a wall-mounted outdoor/indoor enclosure designed for fiber distribution and splicing in FTTH networks. With their compact and uniform design, the splice boxes for both the DIN rail and 19" mounting provide ample interior space for the secure connection of fiber optics. The fiber optic termination box is great for jointing optical cable and pigtail or splitter, which can achieve cable direct and branch connection. We can manufacture and supply a wide range of fiber termination boxes with 20+ years of experience. Fusion fiber optic splicing provides a permanent fusion connection between fibers and offers a lower insertion loss versus mechanical splicing.
