

# **Installing EDFA10G in Chile**

## Overview

---

Installation is recommended in a temperature & humidity controlled, dust-free environment. Plug the AC power cord into the receptacle on the rear panel of the module, and connect to. The AddOn Networks EDFAMUX is an all-in-one optical transmission device which incorporates the functions of a Mux/Demux, Amplifier/s, and a Dispersion Compensator in order to aggregate multiple optical channels over long distances. This manual will first give an overview of specific warning symbols, prior to instructing the user on the technical aspects of the AddOn Networks EDFAMUX. 10G DWDM has helped network operators defer new costly fiber runs, but upgrading data rates at range has proven complex.
