Scaffolds

What You Need to Do Requirements For General Access Scaffolds Guard Rails, Toe Boards and Other Barriers Scaffold Design Scaffold Structures That Normally Require Bespoke Design Competence and Supervision of Scaffolding Operatives Scaffold Inspection The law requires that employers and self-employed contractors assess the risk from work at

height and go on to organise and plan the work so it is carried out safely. Suitable precautions must be taken to prevent falls. General access scaffolds provide a means of working at height while preventing falls and should be provided whenever practicable.
