

Instructions for using explosion-proof sealant in electrical distribution boxes

Overview

It is essential, for proper functionality and to ensure flame / explosion non-propagation, the correct installation of sealing devices next to the equipment to be protected, as clearly indicated in paragraph 13. Explosionproof enclosures are used as classified enclosures, pull boxes, or control panels in rigid conduit systems and with metal clad cable rated for hazardous locations. Proper installation, wiring, and usage are critical to ensuring the safety and functionality of these systems. This compound is to be used only with CHICO-SPS-60Z EYS type sealing fittings in 1/2" to 2" trade sizes. CHICO-SPS-60Z compound is suitable for Class of the CHICO CHICO-SPS-60Z Compound must be between 50°F (10°C) to prevent pressure build-up and possible sudden eruption at - may be skin and respiratory.
