

Insulation for outdoor server racks

Overview

Prioritize ingress protection (IP) ratings—IP55 for dust/moisture resistance or IP65 for pressurized water jets. Temperature tolerance should cover -40°C to 55°C, with 19" rack compatibility for server integration. Rack Height (U Spaces) is a measure of vertical space or the height of equipment mounted in a rack enclosure. An outdoor server rack is a weather-resistant, lockable enclosure designed to house 19-inch IT equipment—servers, switches, routers, power supplies, and environmental controllers—in exposed environments: utility poles, telecom cabinets, parking lots, construction sites, agricultural sensors, or. Discover AZE Telecom's outdoor weatherproof cabinets and waterproof server racks. Durable, secure, and customizable—find the perfect solution for your outdoor telecom needs today! No product is being compare. AZE's 19" outdoor server racks and outdoor network cabinets are ideal for protecting sensitive network systems from any damage due to impacts and harsh climatic conditions.
