

# **Intelligent Outdoor Integrated Power Interface**

## Overview

---

The e-I2PMSTM ODR is a standalone IP55 outdoor enclosure with AC, DC Power distribution and management system with built-in intelligence to optimize the usage of mains and DG which will have substantial reduction in OPEX. In a world that demands 24/7 connectivity, automation, and energy efficiency—even in remote or power-limited locations—our solution delivers. CIPOS™ Intelligent Power Modules for high performance and high intergration We provide a comprehensive portfolio of Intelligent Power Modules (IPMs) covering a wide range of semiconductor technologies, package types, and voltage/current ratings. Integrating power supply system, environment monitoring system, temperature control system and backup power system, It has the advantage of high-reliability, high-efficiency. As 5G micro-base stations extend from cities to suburbs, rural areas, highways, wind and solar power stations, and even islands, these locations lack machine rooms, personnel, and have harsh environments. Traditional power solutions expose issues such as space occupation, complex interfaces, poor.

## Intelligent Outdoor Integrated Power Interface

---

### Intelligent Outdoor Integrated Cabinet in UAE -

DConnect intelligent outdoor integrated cabinet solutions combine climate control, power resilience, and equipment protection in one enclosure. Built from fire
