

Iran installs 2-core optical splitter

PRODUCT MODEL: **RVS**
CONDUCTOR MATERIAL: **Copper**
RATED VOLTAGE: **450/750V**

Iran installs 2-core optical splitter

PASSIVE OPTICAL SPLITTER

A Passive Optical Network (PON) is a fiber optic technology utilizing point-to-multipoint topology and optical splitters to deliver data from a single transmission point to multiple user endpoints. Passive

What are FTTH splitters and how do they work?

How do FTTH Splitters work and their connection to Network Inventory Management are explored in this article.

[Read More](#)

Introduction to Passive Optical Network Splitter Architectures

The configuration below has individual splitters at a central location, but addresses that are typically not reconfigurable by jumpers, so this configuration is a "distributed" split.
