

**ZTP Thermal & Power**

# **Iranian Telecom Desktop Chassis**

## Overview

---

In 2000 there were 252 radios, 158 television sets, 219 telephone lines, and 110 personal computers for every 1,000 residents. Computers for home use became more affordable in the mid-1990s, and since then demand for access to the Internet has increased rapidly. SummaryIran's telecommunications industry is almost entirely state-owned, dominated by the (TCI). The government runs the, which includes three national stations and two national networks, as well as dozens of local radio and television stations.
