

Latest news Fiber optic cable breaks

Overview

Multiple subsea fiber optic cables in the Red Sea suffered simultaneous cuts on September 6, 2025, disrupting global internet and communications traffic. The incident began at 05:45 UTC and has forced operators to reroute traffic between Asia, the Middle East, and Europe over. In an official statement, the police said they have no ongoing criminal investigation into the recent cable break. On 17–18 November 2024, two submarine telecommunication cables, the BCS East-West Interlink and C-Lion1 fibre-optic cables, were disrupted in the Baltic Sea. In late 2024 and early 2025, several important data connections across the Baltic Sea were broken, including between.
