

Lebanon s fiber optic communication

Overview

Telecommunications Minister Charles Hajj announced this week the resumption of the country's fiber-optic internet rollout after years of stalling caused by the onset of the economic crisis in 2019 and, more recently, by the war between Israel and Hezbollah. has been participating in the Lebanese enterprise market for several years now, attaining an honorable reputation of FIBER OPTIC Expertise when it comes to high speed & wide area networks. Fiber to the x (FTTX) is a generic term for any broadband network architecture using optical fiber to provide all or part of the local loop used for last mile telecommunications. As fiber optic cables are able to carry much more data than copper cables, especially over long distances, copper. mobi Fiber is the gold standard of residential and corporate internet connections.
