

Length of fiber optic cable lines in Bangladesh

Overview

Bangladesh currently has 150,000 kilometres of fibre optic cable, 75% of which is overhead and highly vulnerable to natural disasters, according to Faiz Ahmad Taiyeb, special assistant to the Chief Adviser for the Ministry of Posts, Telecommunications and Information Technology. The important objective for optical cable design is to Project fibers so that they can be operated safely in a complicated environment for long period of time. FONSBD has been trying to provide all kinds of optical cables to their clients with protected but precise construct design, state of art. The Executive Committee of the National Economic Council (ECNEC) has approved a Tk 10. According to recent news by the Prothom Alo, the Bangladesh Telecommunication Regulatory Commission (BTRC) has unveiled a web-based interactive GIS map of optical fiber laid across the country, which shows district-Upazila-union level connectivity and technical aspects of the optical fiber cable.
