

Low-loss Malian telecom-grade router for surveillance

Overview

WiFi Halow bridge with 1Km long-distance range, IP65 waterproof, and 802.11n. Ideal for surveillance and video monitoring High-performance dual-band ONT with 2GE, 4G, and 5G WiFi, auto-configuration, remote management, and TR069 support, compatible with major OLTs. Standard surveillance footage might suffice for basic needs, but when it comes to license plate recognition, equipment monitoring, or hazard alerts, latency becomes a dealbreaker. For example: A chemical plant's pipeline leaked, but the control room received the footage 3 seconds late—nearly. Digi industrial routers provide the rugged, reliable network connectivity and remote management tools for heavy-duty applications such as precision farming, oil fields, industrial tanks, water treatment and construction. Wavetel IOT Industrial Routers deploy industrial - grade hardware engineered to withstand extreme temperatures and harsh environments, delivering robust connectivity through 4G/5G cellular, WiFi, and fiber interfaces with native support for protocols like Modbus, CAN, and DNP. Choosing the best WiFi router for your CCTV camera setup is crucial for security and reliability.

Low-loss Malian telecom-grade router for surveillance

Cellular Wireless Router Supports Video Surveillance Transmission

In a smart port, 500 4K cameras provide real-time monitoring of container lifting, vehicle scheduling, and personnel operations. Video data is transmitted back to the monitoring center via a 5G cellular
