

Lszh Optical cable friction coefficient

Overview

Operational Temperature Range: Typically -20°C to $+70^{\circ}\text{C}$ for standard indoor/outdoor use. Find low friction LSZH fiber optic cables with customizable options, verified suppliers, and. The company has industry-leading material comprehensive performance analysis and testing equipment and a small number of testing equipment in south China that can fully meet the European Union CPR regulations and GB31247 cable flame retardant grade. Based on proven stranded loose tube cable designs, these tray-rated industrial cables are flame-retardant and tested to exceed the mechanical/environmental requirements for traditional. To withstand harsh outdoor environments the cable shall have UV resistance and gel-free water-blocking features.
