

Madagascar Fiber Optic Channel

Overview

Key Insight: Madagascar's fiber optic infrastructure is expanding, reaching approximately 12% coverage in 2026, driven by government and private sector investments. Internet penetration has increased to 25%, reflecting rising digital adoption among urban and rural populations alike. The 2Africa subsea cable system has made another step forward, this time landing in the island nation of Madagascar as it works its way up Africa's East Coast. Orange is a French multinational telecommunications company, and the second largest telecommunications company in Madagascar after Telma. 39 million (July 2023) (based on Worldometer elaboration of latest UN data) 1) 6.
