

Making reducers for cable tray bends

Overview

The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer. Great if you are new or just forgot how to do it, this easy to follow guide makes it so simple. Cable trays reducers are essential components in electrical installations, ensuring smooth and safe transitions in complex cable tray systems. Materials and finishes available are mild steel pre galvanised as standard with mild steel hot dip galvanised after manufacture and stainless steel grade 1. For the best results, use a WB30BC Angular Blade Offset Bolt Cutter with 24" (600 mm) long handles.

Making reducers for cable tray bends

Cable Tray Reducers , Cable Management , Metsec

Our range of cable tray reducers are made to order for use in light, medium, and heavy-duty cable tray systems with widths ranging from 50mm - 900mm.
