

Mgts Smart Building Flame-Retardant Optical Cable

Overview

Zion Communication offers the Mine Optical Fiber Cable MGTS, an outdoor stranded loose tube cable with a blue flame-retardant jacket. This cable features a single jacket and single armor for enhanced protection, making it ideal for use in harsh environments, including mining and industrial.

MGTS-20~24Xn Optic Cable is Stranded Loose Tube Mining Flame-retardant Cable The structure of MGTS optical cable consists of a 250µm optical fiber encased in a loose tube made of high modulus material, mit wasserdichten Verbindungen, die das Innere der Bündelader ausfüllen. A steel wire, sometimes sheathed with polyethylene (PE) for cable with high fiber count, locates in the center of core as a metallic. MGTSV-24 core mining flame-retardant communication optical cable MGTS-24B optical cable MGTSVFlame retardant optical cable for cable mining, capable of accommodating 4 to 288 Core, can be used for various overhead, pipeline, buried and other laying, widely used in mining.

Mgts Smart Building Flame-Retardant Optical Cable

MGTS-4B mining flame-retardant communication optical cable

1?Flame retardant communication optical cable for coal minesIt is a special application of fiber optic cables in the field of communication, specifically used in the coal mining industry as communication
