

**ZTP Thermal & Power**

# **Module for activating monitoring supplementary lighting**

## Overview

---

Most emergency lighting manufacturers offer switch and monitoring modules for connecting third-party luminaires to central power systems. During a mains failure or function testing, these modules switch the luminaires on and monitor the connected load. Supplemental lighting with high beam LED light source (or IR light source), a patented lamp-cooling design, and a constant current drive control. These products can be widely used for electronic policing, security surveillance, toll stations, entrance & exit controls, and road monitoring systems. Sie bündelt alle wichtigen Informationen und unterstützt Sie bei allen Prozessen rund um Ihre neue Beleuchtung. LED lighting solutions ✓ From industrial to office ✓ Discover durable & sustainable options from TRILUX. Energy savings – By using intelligent lighting systems features such as Adaptive Dimming and Dwell Time, lighting is only used when needed and adapted to occupancy patterns.
