

Molded cable tray bridging

Overview

Molded cable tray is an energy-saving bridge with certain energy-saving performance. Its concave-convex structure not only saves materials, but also saves electricity, and can save more than 40% of materials compared with traditional cable tray. Cable tray and cable ladder systems are an ideal alternative to electrical conduit systems. With our many years of experience, we are one of the leading manufacturers in this field. In addition, they are designed to protect and safely carry cables and wiring, we introduce wide range of high quality cable tray types that is customized according to the client needs. We produce various types of bridge structures and can choose the best bridge solution for customers according to different usage locations and needs (accepting non-standard customized sizes thicknesses, as well as Chinese standards, European and American standards, etc.

Molded cable tray bridging

B-Line series Cable Tray Design Considerations

Is your cable tray system optimized for safety, dependability, space and cost savings? Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an
