

Monaco Fiber Optic Trench Supplier

Overview

We carry out mini-trench and traditional excavations for laying fibre optics and copper, manholes and equipment. We have our own vehicles and equipment, as well as personnel qualified in confined space work, work at height, road signs and georadar surveys to identify existing. Tesmec offers an integrated value chain with specialized solutions: underground utilities detection and mapping, trenching, vacuum, home connection, backfilling, and road surface finishing. Since 2007 Tecol has been active in the laying of telecommunication infrastructures. Consisted of a complex technology, optical fiber requires a unique know-how, a big technicality. Being connected is a must in a world based on information, and telecom networks are the essential. The project to renovate a drinking water pipe in Monaco is characterised by the buzzword 'high speed' in two respects.
