

Monitoring Core Ethernet Switch

Overview

From experience, two monitoring techniques stand out for getting the job done: SNMP (Simple Network Management Protocol) and Network Performance Monitoring (NPM) solutions. In most cases, Ethernet switches are automatically discovered by ONTAP and monitored by CSHM. Here is our list of the best switch monitoring software packages: Paessler PRTG EDITOR'S CHOICE A collection of monitors that includes switch monitoring with SNMP, NetFlow, and other traffic sampling standards. SNMP monitoring provides good insights into a device's CPU and RAM utilization and an individual port's bandwidth and usage.
