

Moxa optical module communication

Overview

The Moxa SFP-1GLXLC-T is a hot-pluggable Small Form-factor Pluggable (SFP) module that converts electrical Ethernet signals into optical signals for transmission over fiber optic cabling. The ioPAC 6500 Series (also referred to as Intelligent Integrated Node or IIN) is an advanced Linux-based RTU featuring a built-in Layer-2 managed switch. Equipped with an Arm Cortex-A53 quad-core CPU, the ioPAC 6500 Series delivers robust performance. Moxa is a leading provider of edge connectivity, industrial computing, and network infrastructure solutions for enabling connectivity for the Industrial Internet of Things. In this category you can find some Moxa compatible coded Gigabit Ethernet SFP modules and 10Gigabit SFP+ modules. We can offer SFP and SFP+ modules for multi-mode fiber with 850nm and for single-mode fiber with 1310nm.
