

# Multimode Fiber Optic Models and Pricing

## Overview

---

This guide compares multimode cable prices across OM1-OM5 and explains what really moves the number: fiber grade, fiber count, jacket rating, and whether assemblies are factory-terminated. To recap Optical Fiber can be divided into Multimode Fiber (MMF) and Single-Mode optical fiber (SMF). Multimode Fiber (MMF) has a core diameter, typically 50-100 micrometers, has ability to transfer multiple modes of light through the fiber core, uses lower-cost electronics (LED, VCSEL) operates at. Multimode fiber is a common choice to achieve 10 Gbit/s speed over distances required by LAN enterprise and data center applications.

## Multimode Fiber Optic Models and Pricing
