

# **My 100Mbps fiber optic connection to a router is very slow**

## Overview

---

Here's the good news: more often than not, fiber internet slowdowns can be fixed quickly and easily. Sometimes I unplug the cable from my computer and plug it into a laptop, it makes the router recognize the laptop accepts more speed and unlock the 1Gb speed. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. You can fix most of these issues yourself; some only take a few minutes—we'll start with eight of the most common.
