

Namibia Gigabit Optical Module

Overview

The QSFP28 module provides 100GBase-LR4 throughput up to 10km over a standard pair of single-mode fiber (SMF) with duplex LC connectors. This product need to use in pair and match up with fiber converter and optical Ethernet switch with SFP port, it can be used in Ethernet, telecom and. We provide fast and effective installations of fibre cable from outside termination point to a point inside your residence where your router will be placed We use a variety of methods to install fibre infrastructure within a planned Single Dwelling Unit (SDU) area such as trenched solutions, arial. By deploying cutting-edge fibre-optic technology, Lightstruck is bridging the digital divide, ensuring that communities—from the bustling centres of Windhoek to the remotest rural villages—gain access to the vast opportunities the digital age offers. 25G SFP SC Optical Transceiver Module (SMF, 1550nm-TX/1310nm-RX, 10km, DOM, Industrial) Take advantage of our testing program to evaluate the reliability and performance of our optical transceivers. Oryx Fibre Infrastructure is an open access fibre optic network provider in Namibia that owns and operates long distance (backhaul and long haul) fibre infrastructure.
