

New Lithuanian Fiber Optic Splice Box

Overview

The FIMP-M splice box, compactly sized at 115 x 61 x 113 mm, offers a versatile and efficient solution for fiber optic connectivity. Fiber optic laboratory testers provide accurate data on loss, performance, and signal quality, essential for developing, testing, and optimizing optical technologies. Their primary function is to protect and manage the spliced fiber optic cables, ensuring they remain secure, well-organised, and unaffected by environmental factors. We're excited to announce that ELPA REFURB will be exhibiting at ANGA COM 2026, taking place from 19-21 May 2026 in Cologne, Germany.
