

New Zealand High-Density Fiber Optic Distribution Frame

Overview

High Density Optical Distribution Frame provides industry-leading fibre cable protection and management. The fibre optic panel utilizes an internal splicing system that creates a compact, feature-rich, high-density solution. AFL has developed two distribution frames specifically for use in Data Centres, Co-location and Telecommunication environments, that are perfectly matched to a range of AFL's cabling systems. 12port,SC,FC,ST,LC,E2000,24port,48,36,96 port fiber optic odf,with adapters,pigtails, modulized design, for easy management, they are used in fiber optic fusion splicing and storage, management and cabling.

New Zealand High-Density Fiber Optic Distribution Frame

Fiber Distribution Frame

The FieldSmart High Density Fiber Crossover Distribution System (FxHD) is the highest density fiber management frame solution available in the industry today,
