

Norway Micro-Module Data Center Solution

Overview

The new liquid-cooled facility, set to go live in Q2 2025, will host 'the latest generation' of GPUs according to Nscale. InfraPartners will develop the facility using prefabricated modules manufactured off-site. Modulize is a key player in offsite construction, offering a streamlined procurement solution that enhances project bidding and management. Their focus on precision manufacturing and sustainable practices aligns with the growing demand for efficient and eco-friendly modular data center. Looking for flexible, long-term, sustainable and energy efficient Norwegian data center solutions to meet your Gen AI and HPC capacity and power needs?

Then Bulk's N01 Campus is the right choice for you. Polar is a European high-performance data center operator headquartered in the United Kingdom with a clear ambition to deliver next generation data centers. The company develops, owns and operates data centers optimized for artificial intelligence (AI) and high-performance computing (HPC).
