### **Circuit Design for Scalable and Fast Optical Circuit Switching**

Optical circuit switches (OCS) perform a similar function to the old telephone switchboards except that their data is optical in nature. As datacenters and high performance computing (HPC) systems

Optically-connected EPSs are thus required to perform optical-to- electrical (O2E) and electrical-to-optical (E2O) conversions such that the data can be easily buffered in the electrical domain.
