

# **Optical Cable Suspension Cable Process**

## Overview

---

89 describes the general requirements and a design guide for suspension wires, telecommunication poles and guy-lines that support aerial cables for optical access networks. Prysmian has a built-in multi-step quality assurance programme, which covers the entire production process from cable design and raw materials purchasing, to final inspection for any single project. Please consult the cable manufacture tallation instructions for the HUBRPXSUS suspension clamp. These instructions assume that the installer is familiar with optical fiber installations, safety procedures, and Corning Cable Systems specifi. The unique design of the lightweight AFL Mechanical Suspension supports spans of optical ground wire (OPGW) cable through a wide range of line angle changes. Aerial optical cables are available in a variety of designs to suit every overhead application.
