Optical module 200009um300om3

Overview

An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications. The form factor and electrical interface are often specified by an interested group using a (MSA).

Optical module 200009um300om3

UniFi 10G Multi-Mode Optical Module

SFP+ transceiver that supports 10G connections up to 300 m using multi-mode fiber with a duplex LC UPC connector.

On-Board Optical module MSAs
Users of Optical Modules

An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications. Optical modules typically have an electrical interface on the side that connects to the inside of the system and an optical interface on the side that connects to the outside world through a fiber optic cable. The form factor and

electrical interface are often specified by an interested group using a multi-source agreement (MSA). Optical modules can either plug into a front pa
