

Optical splitter ports are available in 100 Mbps and 1 Gbps versions

Optical splitter ports are available in 100 Mbps and 1 Gbps versions

Network speed 100mb vs 1GB

If your PoE switch is mostly 100 Mbps ports and has a 1 Gbps port, you should connect that 1 Gbps port either directly to your NVR (Blue Iris PC) or otherwise use a separate gigabit switch

What is Fiber Optic Splitter and Types

What is a Fiber Optic Splitter? Fiber optic splitter is a passive optical device used to distribute optical signals, which can divide input optical signals into

[Read More](#)

Splitting of QSFP+ and QSFP28 ports

Most QSFP28 ports can be used with either 40G or 100G optics, DAC or AOC cables. Not all QSFP28 port can be split into channels of 10G or 25G: what's required are MACs and PHYs that can support

6 Port 10/100/1000 Ethernet Switch - 4 Copper Ports with 2 SFP Optical

Elegantly simple yet packed with an advanced feature set, the FiberPlex Technologies TIS-8632 is a powerful 6 Port 10/100/1000 Ethernet Switch. The unit features (4) RJ-45 UTP ports as well as (2)

[Read More](#)

Split Ratios and Splitting Level of Optical Splitters

Optical splitters play an important role in FTTH PON networks where a single optical input is split into multiple output, thus allowing a single PON

[Read More](#)

Introduction to Passive Optical Network Splitter Architectures

A fiber broadband provider typically determines and overall split ratio for the network, such as 1x32 or 1x64, and uses combinations of splitters to meet that ratio with each PON port.
