

Outdoor distribution box is waterproof and prevents exposed wiring from leaking

Overview

A waterproof outdoor power distribution box keeps electrical connections safe from water, dust, and bad weather. Typically constructed from durable, corrosion-resistant materials, these boxes are designed to withstand exposure to moisture and harsh environmental. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV. The "IP" in IP65 waterproof junction box stands for "Ingress Protection," a rating system defined by the IEC (International Electrotechnical Commission) that measures how effectively an enclosure prevents the intrusion of solids and liquids.

Outdoor distribution box is waterproof and prevents exposed wiring

Waterproof Distribution box

A waterproof distribution box is an electrical enclosure designed to protect electrical components from water, dust, and environmental elements. It is commonly used in outdoor or harsh environments to
