

# **Outer diameter of 24-core fiber optic cable buried directly in Zimbabwe**

## Overview

---

0 mm, the cable is lightweight yet robust, boasting a tensile strength of up to 1000 N, which provides excellent durability during installation and use. These cables are constructed for durability and performance in harsh environments like power. 24 Core Fiber Optic Cable GYTY53 Outdoor Armored Double Jacket Waterproof Gel Filled loose tube direct burial is used for direct buried underground, it suit for long distance and LAN fiber communications, we supply both the single mode GYTY53 cable and multimode GYTY53 cables. Primary coated single mode fiber, filled, loose tubes, assembled around the Central Strength Member (CSM),filled core metallic moisture barrier, inner polyethylene sheath, galvanized steel wire armour and polyethylene outer sheathed optical fiber optic telecommunication cables complying with. Fiber optic cable is a cable containing one or multiple optical fibers that are used to transmit the signal.
