

Pigtail MPO-MPO

Overview

MPO pigtailed assemblies are factory-terminated assemblies featuring an MPO connector on one end and individually coloured breakout fibers on the other, designed for efficient fusion splicing in high-density environments. Siemon's fusion splice solutions also include an MTP/MPO pigtail option which can be connected to a RIC MTP/MPO adapter plate or plug and play module and then mass fusion spliced within the fiber enclosures. Multimode MTP /MPO connectors are cut according to the global standard PC 0°, while singlemode connectors are cut to the.
