

# **Place the router in the fiber optic box**

## Overview

---

While the ONT converts fiber signals into electrical signals, the Wi-Fi gateway (router/modem) turns those electrical signals into wireless signals that your devices can pick up. Fiber optic internet is generally installed in the following 5 steps, which we'll dive deeper into throughout the article: A technician checks your area and prepares the connection from the neighborhood fiber network. A fiber cable (drop) is run from a nearby terminal that could be either a pole or. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly recap why fiber optics are worth the effort: Lightning-fast speeds (up to 1 Gbps or higher). Of course, your internet service provider (ISP) helps, making things even easier. The technician I spoke with today recommended having the line come in the front of our house through the window frame into our.
