How To Select A Hydraulic Pellet Press For XRF Spectrometer: A

If you're working in a lab that uses X-ray fluorescence (XRF) spectrometry, you already know that sample preparation can make or break your results. A poorly formed pellet can lead to

What does "PR" in the dead wax mean?

As already stated, PR in the deadwax usually means it was pressed by Presswell, but if the lacquer was cut by MasterCraft in the pre-Howard Craft days, then PR can also stand for Paul

ASD TerraSpec 4 Hi-Res Mineral Spectrometer

The ASD TerraSpec 4 Hi-Res mineral analyzer brings new levels of efficacy to mineral exploration technology. This state-of-the-art mineral spectrometer offers

[Read More](#)

Introduction to FT-IR Sample Handling

The output mirror then directs this scattered energy to the detector in the spectrometer. The detector records the altered IR beam as an interferogram signal, which can then be used to generate a

Process Mass Spectrometers for Real-Time Gas Analysis

Process mass spectrometers are utilized for gas analysis due to their high accuracy in identifying and quantifying gas components, real-time monitoring capabilities, and sensitivity to trace impurities.
