

# **Price of DIY fiber optic cable delivery frame**

## Overview

---

Prices vary based on the length of cable needed, installation method (aerial or underground), and labor rates in your area. Expect to pay \$1 to \$12 per linear foot, depending on project complexity and materials. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. Do suppliers provide buyers with various types of optical distribution frame, ODFs, for different applications?

An optical distribution frame is important for managing and distributing fiber optic cables and connections.
